Career Objective

Motivated and detail-oriented graduate seeking a role in logistics and supply chain management where analytical thinking, data handling capabilities, and technical expertise can be applied to optimize planning, procurement, inventory control, and distribution processes. I am eager to leverage modern technologies including AI, automation, and digital tools to enhance operational efficiency, support data-driven decision-making, and contribute to measurable organizational growth while continuously developing my professional expertise.

Career Summary

Analytical professional with hands-on experience in structured process execution, data validation, reporting, and cross-functional coordination. Currently pursuing a Postgraduate Diploma in Logistics & Supply Chain Management, with a strong interest in demand planning, inventory management, logistics coordination, and ERP/SAP-supported operations.

Experience History

Total Years of Experience: 2 Year 9 Month+ (Technical & Professional)

- **Senior Mentor**, Shopnojoyee Academy Care (Jan 2021 – Feb 2024) Mentored SSC and HSC students, focusing on structured learning, discipline, communication, and academic planning.

Language Proficiency

- **Bangla:** Native proficiency
- **English:** Professional working proficiency
- **Hindi:** Professional working proficiency

Project Experience

ORDERFLOW – Inventory & Order Management System

- Worked on developing end-to-end order processing workflow including order placement, stock deduction, and fulfillment tracking
- Implemented real-time inventory update system to prevent stock mismatch and overselling
- Assisted in stock reconciliation and inventory accuracy reporting
- Supported role-based access control for admin, warehouse, and sales operations
- Contributed to improving overall inventory visibility and operational efficiency.

AUTO PING – AI Chatbot Platform

- Worked as a Full Stack Developer, handling both frontend and backend development
- Implemented AI API integration and managed token optimization
- Ensured seamless communication between user interface and AI backend services
- Designed structured conversation workflows to automate customer query handling and reduce manual support workload
- Contributed to delivering an efficient AI-driven solution for automated customer support.

PROCUREX – Procurement & Vendor Tracking Module

- Developed vendor database management and purchase order tracking features
- Implemented approval workflow for procurement requests and order confirmation
- Assisted in monitoring supplier delivery timelines and procurement status
- Generated operational reports to support purchasing and planning decisions
- Ensured structured data validation for procurement compliance
- Contributed to streamlining procurement operations and improving vendor management visibility.
